Node-RED interface showing a flow named "Flow 1" with the following components:

- Nodes:**
 - IBM IoT (connected)
 - Temp (function node)
 - Humid (function node)
 - Moisture (function node)
 - debug 1 (debug node)
 - Temp (output node)
 - Humid (output node)
 - Soil Moisture (output node)
- Connections:**
 - IBM IoT connects to Temp, Humid, and Moisture.
 - Temp, Humid, and Moisture connect to debug 1.
 - Temp, Humid, and Moisture connect to their respective output nodes.
- Debug Console:**
